UNIVERSITY OF CALIFORNIA, SAN FRANCISCO SEPTEMBER 1970 VOL. 3 NO. 4

Dr. Carman Acting Dean of the School of Medicine

Dr. Charles T. Carman has been appointed Acting Dean of the School of Medicine at the University of California, San Francisco, with approval by the Board of Regents. He succeeds Dr. Stuart Cullen who resigned in January and who began a sabbatical at the end of July.

A man respected by his colleagues and students for his own teaching ability, Dr. Carman has received several awards given by students to the faculty member whom they consider to be the "Outstanding Teacher."

During the years that Dr. Carman was Chief of Chest Service at Moffitt Hospital, he made many contributions to undergraduate and postgraduate teaching, including a post-master's course for nurses specializing in respiratory diseases. As a clinician he emphasizes in his teaching the relationship between the laboratory and the bedside, and encourages his postgraduate students to investigate those areas which he has observed in his patient care to have the greater need for research.

A member of the faculty since 1955, Dr. Carman has worked extensively to improve teaching and training programs in the School of Medicine. In his capacity as Associate Dean, he supervised development of the new curriculum and a mechanism for systematic evaluation of the quality of courses and teaching which were put into effect last fall.

As Chief of Staff at Ft. Miley Veterans Administration Hospital, during the past two years he has developed major new programs in patient care, teaching, and research at the hospital. These programs, which include health team members of the UCSF Schools of Nursing, Dentistry, and Pharmacy . . . as well as Medicine, have attracted outstanding medical teachers and scientists to the faculty.

A graduate of the University of California, Berkeley, Dr. Carman received his medical degree from the University's San Francisco campus in 1951, and was the Gold Headed Cane Winner that year.

Dr. Carman is a member of the American Thoracic Society, President-elect of the California Thoracic Society and a member of other local and national professional societies.

Distinguished Teaching Awards Presented

On June 10, awards were presented to four outstanding professors in the School of Medicine. The choice was made in a poll of 520 students and 570 House staff. The recipients were John V. Carbone, M.D., Department of Medicine; F. William Blaisdell, M.D., Department of Surgery, SFGH; Mervin Goldman, M.D., Department of Medicine, UCSF; and Ellen Brown, M.D., Department of Medicine, UCSF. Dean Cullen presented the awards.

Two other award winners were announced: Hibbard E. Williams, M.D., Associate Professor of Medicine, and James V. Lawry, M.D., Assistant Professor of Anatomy, each won the $500 Kaiser Award.

(More awards, page 6)

Distinguished Teacher of the Year

Distinguished Teacher of the Year was Thomas Michael Christie, D.D.S., Ph.D., of the School of Dentistry. In making the award, the Academic Senate of this campus specifically commended Dr. Christie for his basic approach to teaching which emphasizes that learning is an individual matter and that the student shares equally in the responsibility for his education. By presenting material in a variety of ways . . . discussions, syllabi, visual demonstrations . . . Dr. Christie believes that each member of the class thus has an opportunity to choose the method by which he or she learns most efficiently. Dr. Christie's own experiences as a student inspired him to design his courses to stimulate individual creativity and responsibility in his students.

An Assistant Professor of Oral Biology, Dr. Christie received his degree in dentistry in 1955 from the University of Illinois

AMA—ERF AWARD TO UCSF

The San Francisco Medical Society presented a check in the amount of $8,432.00 to the University of California School of Medicine on behalf of the American Medical Association's Education and Research Foundation to further medical education (AMA-ERF).

The award, made by Philip L. Pillsbury, M.D., President of the medical society, is part of more than a million dollars voluntarily donated during the past year by the nation's physicians and their wives to AMA-ERF medical educational efforts. The gift was accepted by Stuart C. Cullen, M.D., Dean, UCSF School of Medicine.

Currently there are 99 medical schools throughout the nation graduating about 8,000 physicians each year. About $5 million is contributed annually by physicians to the financial support of these schools. It is used to expand postgraduate educational programs, to train future doctors and to develop new teaching facilities.

LONG AWARDS

Two members of the faculty and three graduate students shared the first annual Long Foundation Prize for Excellence in Teaching, according to Dr. Jere E. Goyan, Dean of the School of Pharmacy. Faculty recipients were Dr. Roger G. Ketcham, Professor of Chemistry and Pharmaceutical Chemistry, and Dr. Donald Heyneman, Professor of Parasitology. Each received $1,000.

The three graduate student winners were Mr. Ermias Dagne, Dr. Julio A. Munoz, and Dr. Clarence T. Ueda. They received $200 each.

AN AFTERNOON WITH MR. LURIE

The Damon Runyon Memorial Fund has awarded a grant to UCSF in the amount of $8,000 for the investigation of "The Nature of the Immune Defect in Hodgkin's Disease," a research project conducted by Lynn E. Spitler, M.D., Post-Graduate Research Physician.

Financier Louis R. Lurie, a Director of the Damon Runyon Cancer Fund, presented the award to Stanley C. Bateman, UCSF Assistant to the Vice Chancellor for Academic Affairs, Office of Contracts and Grants. Mr. Bateman accepted the check in behalf of Dr. Spitler.

The grant will allow Dr. Spitler to continue her extensive research on this aspect of Hodgkin's Disease.

DR. VEITH ON COVER OF MODERN MEDICINE

Dr. Ilza Veith, pioneering medical historian at the University of California, San Francisco, was the cover story subject in the June 1 issue of *Modern Medicine,* a leading national medical journal.

Dr. Vieth, came to the University in 1964 as professor of the history of medicine. Devoted primarily to Chinese medicine, she currently is professor of the history of psychiatry, and professor and vice chairman of the Department of the History of Health Sciences.

A medical student for three years, Dr. Veith received a Ph.D. degree in the history of medicine – – the first to be given in the United States – – from John Hopkins University in 1947. Three years earlier she took an M.S. degree in history at the school.

Prior to her appointment at the University of California, Dr. Veith taught the history of medicine at the University of Chicago for 14 years; was editor of medicine and biology at the University of Chicago Press from 1951 – 53, and was Alfred P. Sloan Visiting Professor at the Menninger School of Psychiatry in 1963.

Among the professional societies to which Dr. Veith belongs are the American Association for the History of Medicine, the History of Science Society, and the International Society of the History of Medicine. She is an honorary fellow of the American Psychiatric Association, vice president of the Bay Area Medical History Society, a fellow of the Royal Society of Medicine (London), and chairman of the research group on the history of neurology of the World Federation of Neurology.

Dr. Veith, her husband, Hans von Valentini Veith, and their wirehaired dachshund, Wenzel, live in Marin County. Their home features a Chinese moongate, Japanese garden, and 5,000-book library where Dr. Veith does much of her writing.

CRI TRAINEE FROM OSAKA

This summer Aya Hanai was a student in UCSF's Cancer Research Institute. Miss Hanai, from the Osaka Cancer Registry in Japan, spent two months here for training in CRI's Tumor Registry Training Program. She will now be able to train her own hospital personnel to operate Tumor Registries in Osaka.

When she first wrote to the American College of Surgeons, Miss Hanai expressed her desire to develop Tumor Registries in Osaka. She received their Manual on Registries, translated it into Japanese and had it published in a Japanese medical journal.

"I then received an invitation to take part in your training program at U.C. as soon as there was an opening," she told us. "I applied for a government sponsored grant in order to come. There are three such grants given each year, and I won one of them. My study-trip is sponsored by the Osaka Cancer Registry, the Osaka Medical Association, [illegible] my own hospital, The Center for [illegible] Diseases of Osaka. All of these agencies are supported by the Osaka Prefecture Government," she added, "from whom I have also received a stipend."

She was born in 1935 in Osaka and resides there now with her father. There is one older sister. Miss Hanai is a graduate of Osaka Women's University with a degree in Mathematics and Statistics. In addition to her administrative position, she attends the Osaka School of Medicine, as a student of Public Health. This is the only school in Japan which offers this curriculum.

Miss Hanai attended the 10th International Cancer Congress in Houston prior to coming to UCSF. After leaving us, her plans were to visit Cancer Registries on the East Coast, in London, Copenhagen, Norway and Sweden, before returning home. "A busman's holiday," said Dr. Calvin Zippin, Professor of Epidemiology and Head of the Cancer Research Institute's General Tumor Registry.

According to Dr. Zippin, UCSF's Tumor Registry Training Program is the only one of its kind in the world, and because of this, his Training Program goes on the road several times a year. In June, Mrs. Ruth Pavel and CRI staff members accompanied Dr. Zippin to Albany, New York, where they conducted a Training Program for some 50 public health representatives from 40 hospitals in the State of New York. Dr. Sydney E. Salmon, Assistant Clinical Professor of Medicine at UCSF, lectured via videotape, a medium used extensively in the CRI training sessions. The traveling program lasts several days. The home base training program lasts one month, although in some cases it can be extended. This November, trainees are expected from Brazil and Colombia, South America.

The Cancer Research Institute's training program is supported under a contract with the Division of Regional Medical Programs, Public Health Service, Washington, D.C. Under this contract, there is a commitment for three programs a year outside the university – there have been requests for many times that amount from across the country.

A MILESTONE IN PIO

Virginia Milestone, a June graduate of Presentation High School in San Francisco, won regional prize in the Annual Harding Memorial Essay Contest, sponsored by the San Francisco Junior Chamber of Commerce.

Ginny's essay was judged to be one of the ten best submitted in Northern California. As part of the prize, she was guest of the S.F. Propeller Club for the day where Lt. Governor Ed Reinecke presided over Jaycee luncheon ceremonies.

Ginny began working in the Public Information Office in February as a clerk typist. She is one of eight children. Her older sister, Terry Milestone, is a secretary in the Moffitt Hospital operating room.

MRS. SANDS GRADUATES

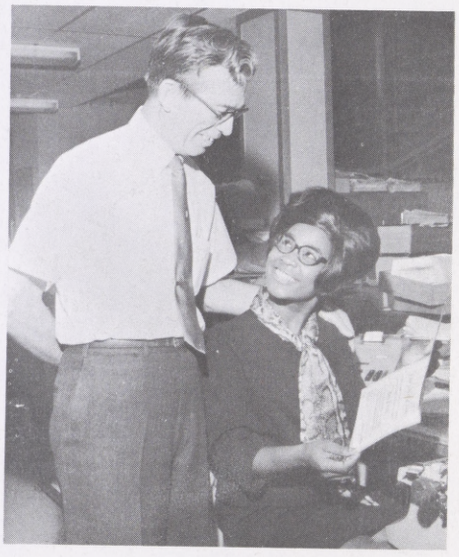
Accounting employee, Mrs. Mattie P. Sands, (shown here with supervisor George Burt) became a high school graduate in June. She was one of 55 adults to receive a diploma from the Mission Adult School in San Francisco.

Mrs. Sands, who comes from Florida, left school in the 10th grade to get married and have a family. She has worked on the San Francisco campus since 1962, first as an employee in the Laundry Division, and now in Accounting.

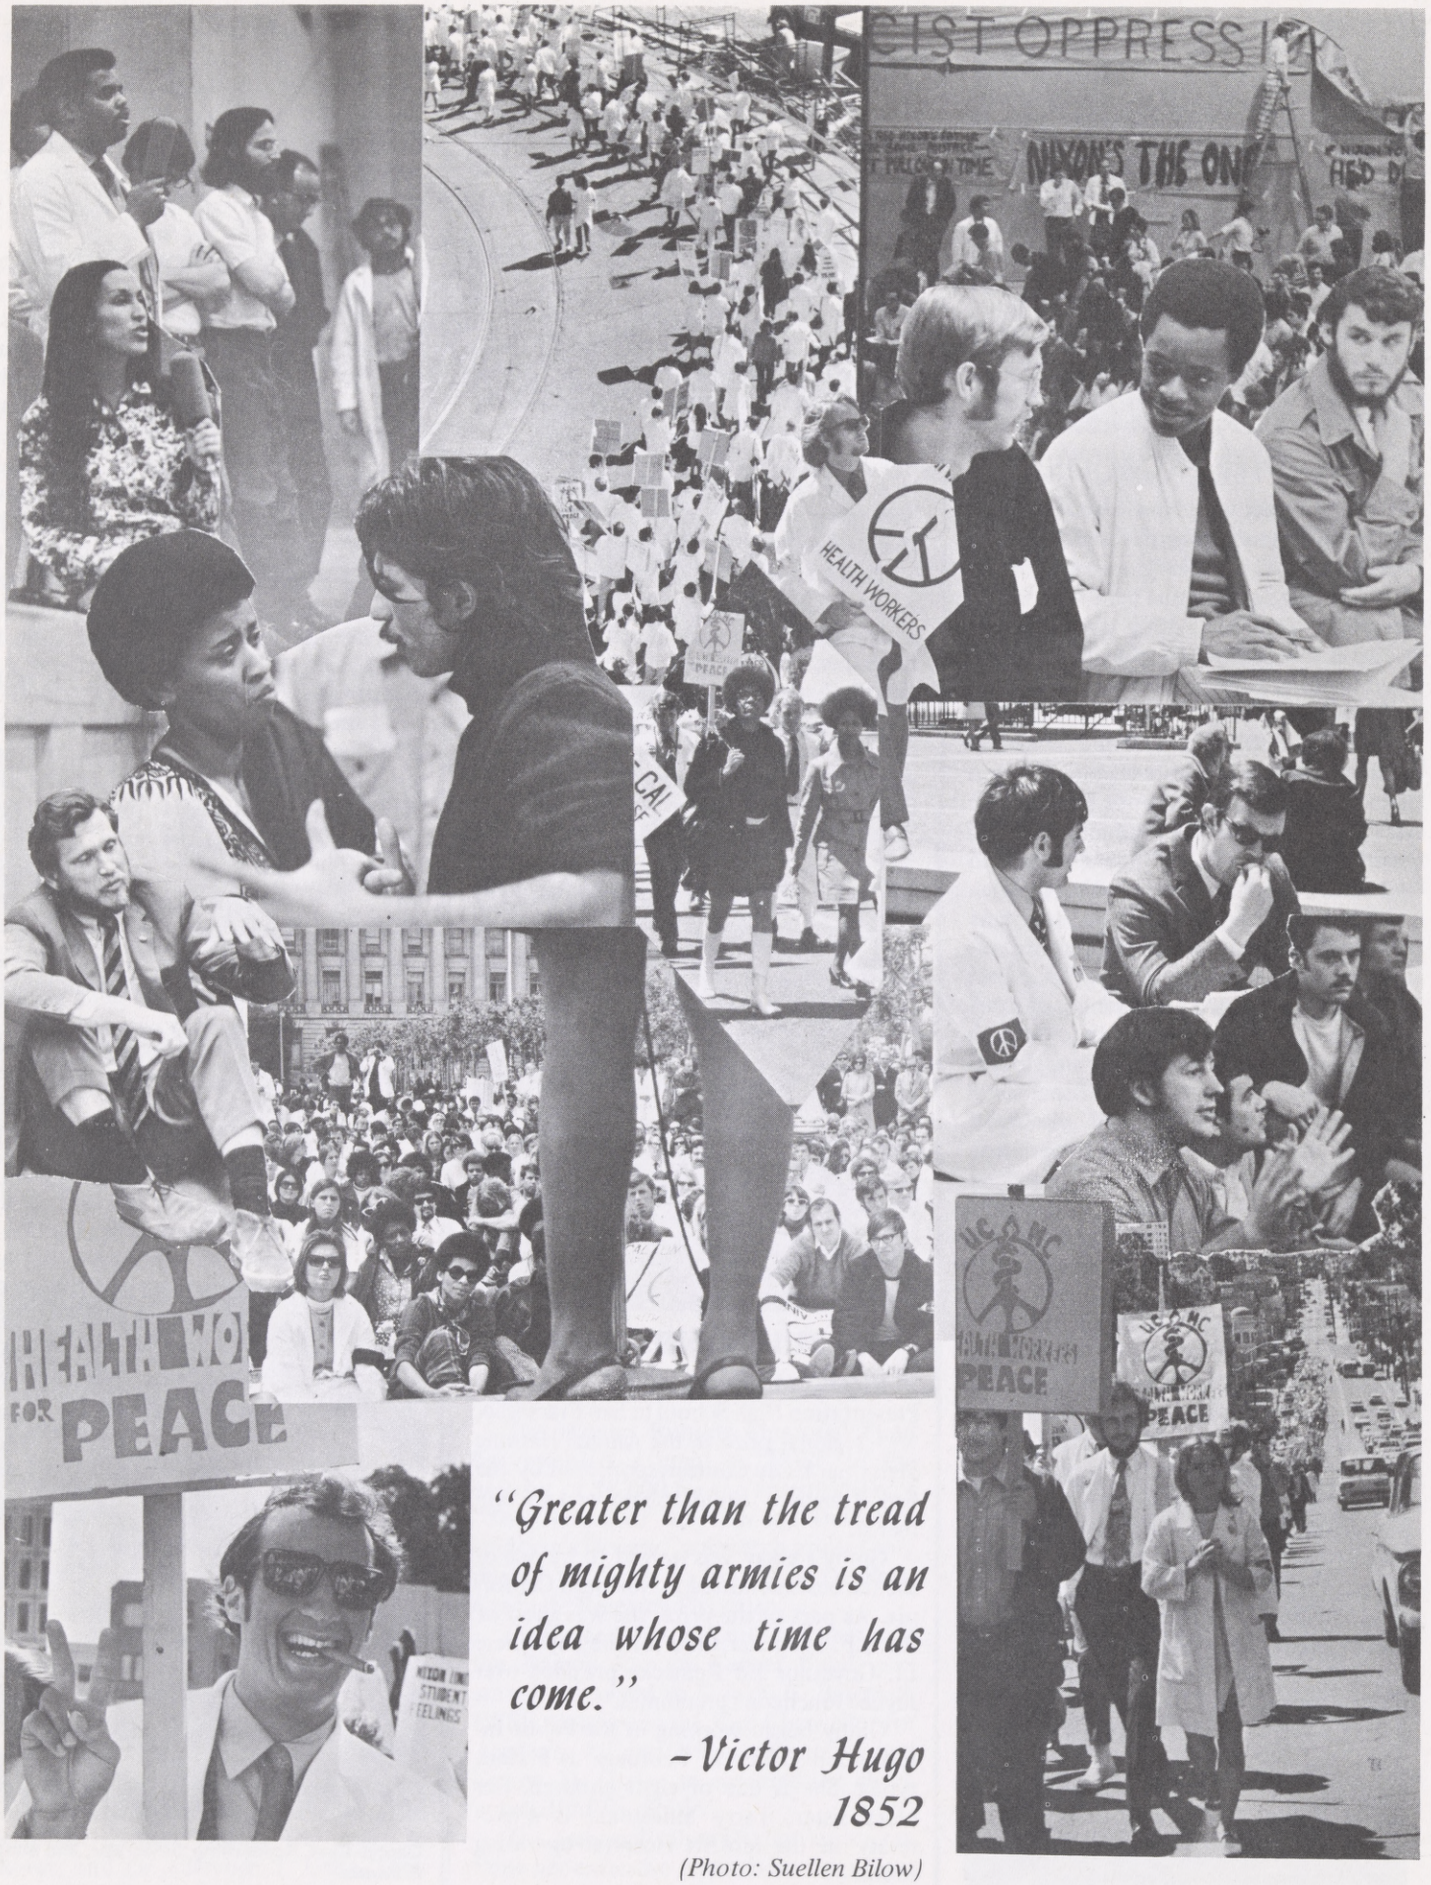
She decided to go back to school on the advice of David Johnson of Personnel. "I can't give you a job until you get your diploma. Why don't you go at night," he advised. After 3 semesters of school, four nights a week (plus working all day and taking care of a family), Mattie Sands did it. She graduated. And while still in school, she got the job she wanted in Accounting as a trainee.

"I was really embarrassed at first to be going back to school at my age. But my self-consciousness disappeared when I saw two middle-aged ladies in my class. Their courage to go ahead and finish school so late in their lives sure helped me to do it, too!" Mrs. Sands plans to continue her education. She is now attending City College and plans to go on to San Francisco State for a degree in Business Administration.

Her co-workers and family have been most encouraging. "I couldn't get a good job. You have to get your education when you're young – – when it's there for you. It's hard, you know? It's hard doing it the way I've had to do it. But," she smiled, "I'm doing it."



George Burt, Accounting Supervisor, and Mattie P. Sands.



"Greater than the tread of mighty armies is an idea whose time has come."

DR. BOYD WINS HYGEIA AWARD

The 1970 School of Pharmacy "Bowl of Hygeia Award," the most distinguished prize a pharmacy student can receive was awarded to Dr. Eddie L. Boyd, according to Dean Jere E. Goyan. This award, a replica of an ancient symbol of the profession of pharmacy, is bestowed upon that senior pharmacy student, who in the eyes of the faculty and his fellow classmates "best demonstrates the qualities of the ideal pharmacist."

Dr. Boyd – the first black student to receive this award – distinguished himself by striving to develop clinical pharmacy services in the black community. He was a pioneer in the formation of the Minority Recruitment Committee and gave of his time willingly in an attempt to interest minority students in the profession of pharmacy. As a direct result of his activities, 16 minority students are presently enrolled in the school.

Dr. Boyd will join the faculty as a Clinical Instructor in Pharmacy, and will continue his professional activities as a clinical pharmacist at Fuller's Pharmacy, located in the Bayview-Hunter's Point Area of San Francisco.

Certificates of Honorable Mention were also presented to Drs. David S. Adler and Gary L. Manley. Dr. Adler has a long history of community involvement, starting with his development of pharmaceutical services at the Haight-Ashbury Clinic and leading to his formation of the Drug Information Committee, the student group which presented numerous programs on drug abuse to schools located in the San Francisco Bay Area. In 1969, this group received a national award for their efforts, The American Pharmaceutical Association "Public Education Activities Award."

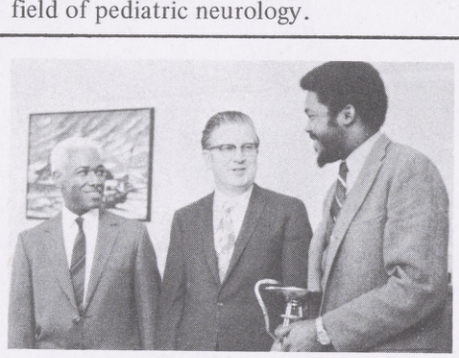
Dr. Manley has worked with local, state and national pharmaceutical associations, and served as President of the University of California Student American Pharmaceutical Association Chapter, which received the 1969 "Outstanding Student Chapter Award" in competition with 71 other student chapters.

Both Drs. Adler and Manley will continue their training as members of the Hospital Pharmacy Resident program at UCSF.

GRANT GOES TO DR. KOROBKIN

Dr. Rowena Korobkin, who graduated from the School of Medicine in June, was the recipient of a fellowship from the Epilepsy Foundation of America for her research in epilepsy. Dr. Korobkin received the $900 grant in June for her study of the biochemical mediators of synaptic transmission. Her advisor in the project was Ivan F. Diamond, M.D., Assistant Professor of Neurosurgery in Pediatrics, UCSF.

A native of New York, Dr. Korobkin received her B.A. from Bryn Mawr College and attended Yale University, School of Medicine for two years. She came to UCSF in her third year when her husband, Melvin Korobkin, M.D., began his residency in Radiology here. She will serve a pediatric internship at Children's Hospital of Oakland, and plans to specialize in the field of pediatric neurology.



Wayland C. Fuller, owner of Fuller's Pharmacy, San Francisco; Dr. Jere E. Goyan, Dean, School of Pharmacy, UCSF; and Dr. Eddie L. Boyd, recipient of the *Bowl of Hygeia* award.

NEW YORK LIFE SCHOLARS

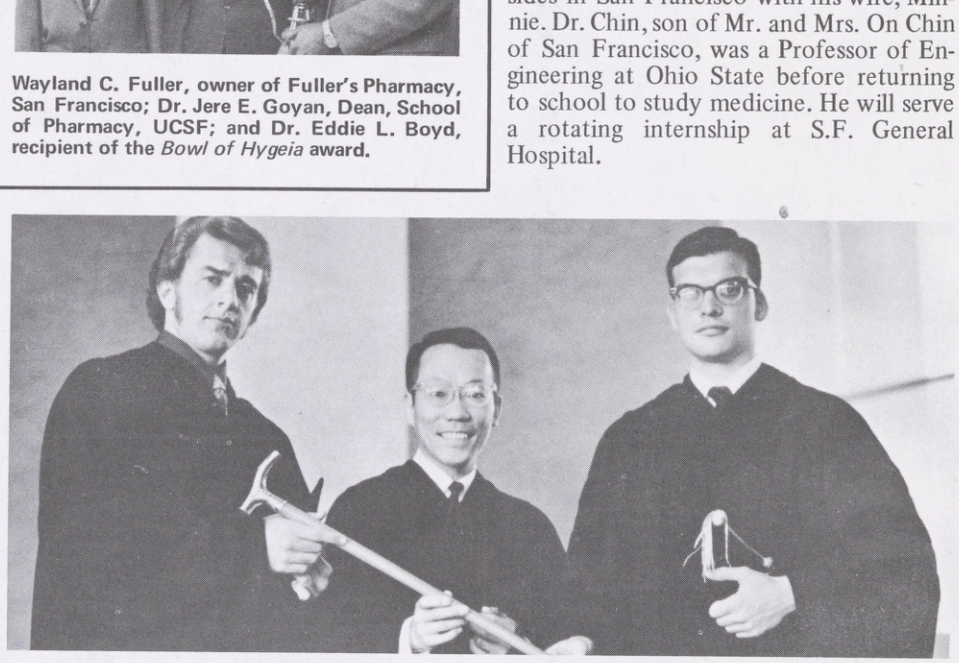
Four UCSF students in the School of Medicine, joined New York Life Insurance Company officials recently at a luncheon in San Francisco, and were honored by that company as New York Life Medical Scholars.

The winners were William J. Alton, 1st year; Michael M. Conway, 2nd year; Robert E. Drickey, 3rd year; and Kenneth Matsumura, 4th year. Each student's scholarship provides for room, board, tuition and fees for the school year.

GOLD HEADED CANE

David Schumacher was the winner of the coveted Gold Headed Cane in June. He was judged by his classmates and professors as best exemplifying the qualities of a "true physician." Dr. Schumacher, 26, and his wife, Sandra, have moved to Colorado where he will serve a medical internship at the University of Colorado Medical Center. He is the son of Mr. and Mrs. Dale Schumacher, Phoenix, Arizona.

Honorable mention went to Dennis J. Flora and to Paul Chin. Dr. Flora will serve a surgical internship at UCSF. He resides in San Francisco with his wife, Minnie. Dr. Chin, son of Mr. and Mrs. On Chin of San Francisco, was a Professor of Engineering at Ohio State before returning to school to study medicine. He will serve a rotating internship at S.F. General Hospital.



Dennis J. Flora, Paul Chin and winner David Schumacher (l-r).

Dr. Carman Acting Dean of the School of Medicine

(Continued from page 1)

The son of Mrs. Alta May Carman of Seneca, Kansas, Dr. Carman is married to the former Marilyn Wheatley of Seneca. They have two children, Timothy and Melissa.

Distinguished Teacher of the Year

College of Dentistry, and his Ph.D. in Anatomy from UCSF.

Dr. Christie has also been the recipient of the Outstanding Instructor award given by the Dental Hygiene Class of 1969 and the Outstanding Instructor award from the Associated Dental Students, 1970.

News from SFGH

S.F. GENERAL HOSPITAL HONORS MEDICAL DEAN STUART C. CULLEN

UCSF and SFGH staff members said thank you to Stuart C. Cullen, M.D. at a reception there July 22nd honoring his retirement as Dean of the School of Medicine. Host Dr. Ernest P. Guy, Chief of Anesthesia Service, presented Dr. and Mrs. Cullen with boat-watching accoutrements for their Belvedere sun deck.

In fulfillment of his promises Dean Cullen was instrumental in providing funds for the now extensive ambulatory and community medicine service, for the until-recently vacant Hospital Administrator's position, and for senior faculty, budgetary and administrative positions and resources, and supportive services at SFGH.

The recently opened Outpatient Clinic Service had more than 150,000 patient visits last year and with the creation of new clinics in the evening the number is ever increasing. "There should be greater development of the Outpatient Service to provide whatever the community, not just the geographical vicinity, needs," Dr. Cullen said. "Students and House Staff going into practice need to know and have exposure to systems of delivering health care, and SFGH provides this." Dr. Cullen said he would like to see San Francisco General Hospital be, as a function of the University of California's San Francisco medical center, a *primary* institution for direct delivery of university-caliber medicine to the people of San Francisco.

Dean Cullen will be a visiting professor at the University of Ulm in Germany for three months beginning the first of October. He will assist in the development of the University's new school of medicine. Upon his return early in 1971, he will become professor of anesthesiology.

Dr. and Mrs. Cullen are, at this time, touring Great Britain and the Continent until his appointment at Ulm begins. While touring Europe, Dean Cullen hopes to interview students at various universities particularly in the Scandinavian countries, Britain and the other nations which have national health insurance to determine the relevance of medical school curricula vis-a-vis national health insurance.

Other visiting professors from UCSF at Ulm's new medical school include Dr. Werner Rosenau, Dr. Henry Moon, and Dr. Klaus Berblinger.

FIRST ANNUAL AGGELER MEMORIAL LECTURE AT SFGH-UCSF

Dr. Paul M. Aggeler, Professor of Medicine until his death in September of last year, was a widely respected hematologist and a world-renowned authority on blood-clotting problems. He carried on extensive research at both San Francisco General Hospital, where he was Chief of Hematology Division, and at Children's Hospital. He had an outstanding ability to train and inspire young physicians for research careers.

The Paul M. Aggeler Memorial Fund was set up by UCSF and SFGH under the direction of Drs. Louis K. Diamond and Ralph O. Wallerstein to commemorate this physician. The fund will be used as honoraria for a national or international lecturer chosen by a committee; the lectures will be held annually both at General and UCSF.

The First Annual Paul M. Aggeler Memorial Visiting Professor on September 22 and 23 will be Samuel I. Rapaport, M.D., Professor of Medicine at the University of Southern California and an internationally known Hematologist. On Tuesday, September 22, Dr. Rapaport will conduct rounds with the House Staff at San Francisco General from 9:00 to 11:00 a.m., and Medical Grand Rounds in the SFGH Pathology Auditorium from 11:00 to noon, and a special seminar with the House Staff in the afternoon.

On Wednesday, September 23, at the University of California, San Francisco, Dr. Rapaport will speak at Medical Grand Rounds, Medical Sciences Auditorium from 10:30 to noon.

For further information on the program, contact Dr. Wallerstein.

Cecilia Vaughan Memorial Fellowship

The first Cecilia Vaughan Memorial Fellowship in Ophthalmology, established this year at the University of California, San Francisco, has been awarded to Dr. Mario Valenton of Manila, Republic of the Philippines. Dr. Valenton will train in the Proctor Foundation on the San Francisco campus. The Foundation is considered the world's leading center for the study of eye infections.

Announcement of the new memorial fellowship and its first recipient was made jointly by Dr. Michael J. Hogan, Chairman of the Department of Ophthalmology, and Dr. Phillips Thygeson, Director emeritus of the Francis I. Proctor Foundation for Research in Ophthalmology. The fellowship will alternate each year between the two facilities.

The Cecilia Vaughan Memorial Fellowship was established at this campus in memory of the daughter of Dr. and Mrs. Daniel G. Vaughan of San Jose, California. Miss Vaughan, age 18, was killed in an auto accident in Los Gatos on April 12 of this year. She had been accepted at the University of Santa Clara as a freshman, where a separate memorial scholarship has been established.

A graduate of the University of the Philippines, Dr. Valenton is an outstanding young ophthalmologist who is particularly interested in the study of eye infections. He is the son of Attorney and Mrs. Artemio E. Valenton of Manila. Accompanying Dr. Valenton during his year in San Francisco is his wife, Erlinda, daughter of Attorney and Mrs. Jose Valmote, also of Manila.

After completing his training here, Dr. Valenton will assume teaching and research duties in Manila at the Philippine Eye Research Institute, University of the Philippines.

Dr. and Mrs. Cullen, assisted by Dr. Ernest P. Guy, opening red and blue nautical deck chairs.

The Campus Bulletin is published by the Office of Public Information, University of California, San Francisco. Send news information for publication to Donna Chaban Patrick, 509 University Hospital. Copy deadline is one month before publication date.

The CAMPUS BULLETIN is published eight months per year. In October, November, February, March and May, the Campus Bulletin will be available in newsstands at ten central locations on campus. In September, December and June, the CB also will be mailed to the homes of all students, faculty, house-staff and employees.

BULLETIN BRIEFS

David A. Wood, M.D., Director of Cancer Research Institute, has been re-appointed to a number of offices in the field of Cancer Research. These include the Committee on Mammography and Diseases of the Breast, Commission on Cancer at the American College of Radiology for the coming school year; and is reappointed a Research Collaborator through June 1971 in the Medical Department of the Atomic Energy Commission's Brookhaven National Laboratory at Upton, New York.

For a 4-year term ending January 15, 1974, Dr. Wood has been reappointed to the Cancer Advisory Council by Governor Reagan. At their organizational meeting of the Council in Los Angeles, Dr. Wood was elected unanimously to succeed himself as Chairman for a fifth consecutive year. The 15-member Council is concerned with the control of medical quackery in the diagnosis and treatment of cancer, and serves in an advisory capacity to the California State Department of Public Health.

Dr. Wood also received the "Lucy Wortham James Award" during the Spring, for outstanding contributions in clinical research aspects in the field of cancer for 1970. The Award, which has been made annually since 1960, was made possible by a donation to the James Ewing Society from the New York Community Trust, a philanthropic foundation. The estate of Mrs. Lucy Wortham James was placed in custody of this foundation to continue the lifelong practice of Mrs. James of contributing to medical advances.

* * *

Mr. Joseph Yeaton, who has been Assistant Director of the Computer Center, will assume the responsibility of Acting Director of the Computer Center and the Office of Information Systems through August 31, 1971, while director Dr. John A. Starkweather is on sabbatical leave.

During his sabbatical, Dr. Starkweather plans to develop methods of improved transfer of use of computer-instruction materials, and to add to skills in programming computers for language manipulation.

Martin J. Cline, M.D., is working on a study of malignant transformation of cells at the Imperial Cancer Research Fund Laboratories, London, England. This was made possible through a $13, 400 fellowship from the Eleanor Roosevelt International Cancer Fund. He is one of four Californians working overseas under this grant. He will spend part of his year at the Royal Melbourne Hospital, Victoria Australia.

Michael J. Hogan, M.D., Professor and Chairman of the Department of Ophthalmology, was guest lecturer during the 56th annual postgraduate course and summer convention of the Colorado Ophthalmological Society in Vail, Colorado.

* * *

J. Englebert Dunphy, M.D., Chairman, Department of Surgery, was General Chairman of the International Trauma Symposium, "Research on the Care of the Injured." The meetings took place in Washington in late May, and were sponsored by The National Institute of General Medical Sciences.

* * *

Lloyd H. Smith, Jr., M.D., was elected a Fellow of the American Academy of Arts & Sciences at its 190th Annual Meeting held in Boston at the beginning of summer.

* * *

John D. Rawls, Jr., Assistant to the Vice Chancellor, participated in an Institute of Educational Management this summer at Harvard University.

* * *

Helen B. Martin, Medical Records Librarian for 40 years, retired from her position in June. A reception was held in her honor and among her retirement gifts (a gold watch, an emerald charm, boxes of herbs, perfume) was Miss Martin's own Medical Chart, complete with "discharge diagnosis" signed by Drs. Bell, Page, Schindler and others.
